HEAT WAVE

Treatment of the week

Help banish sagging skin and wrinkles with Regen Tripollar – a new pain-free, no-needle treatment.

It works by sending radio frequency (RF) waves deep into the dermis to stimulate the growth of new collagen fibres. This then tightens your skin leaving it looking younger.

Our tester's verdict: 'First the therapist slathered on a cool gel, then she massaged my face, neck and chest with an RF prong, which gave

off a pleasant heat. My skin looked and felt smoother for days and my frown lines were less noticeable.'

It costs from £100 per treatment. To find a salon call 020 7226 6560 or go to www.pashaconnections.com.
